

Stage CARES offers innovative technology to empower communities in Wisconsin with their response to the opioid epidemic. Our platform provides intuitive tools for data collection, analysis, and visualization, ensuring effective utilization of resources and compliance with settlement requirements.

**CUSTOM ROADMAP**

**Assess Your Strengths**

The CARES Assessment is a systematic tool developed from years of experience of working with localities like yours to understand your current strengths, needs, priorities, and effectiveness of your opioid abatement work. We work with you, wherever you are in the journey, to understand what is working in your community to build off of the solid foundation you have created.

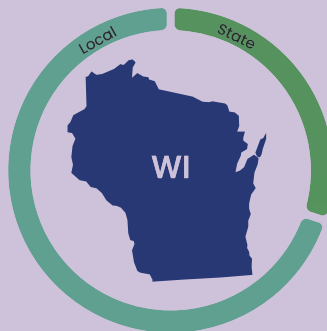

**Custom, Evidence-Based Opioid Abatement Plan**

CARES delivers a custom opioid abatement strategic plan based your assessment and our patent pending analytics.

**Align Your Resources. Build Your Budget**

Resources are limited and budgets are finite. Our goal is to ensure communities are investing their opioid settlement and other abatement funds in the most efficient and impactful way possible.

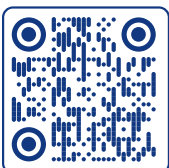

Wisconsin lacks public reporting requirements or enforcement provisions in opioid settlement agreements.

State: 30%  
 Local: 70%

14,892 people have died from opioids in Wisconsin since 1999.\*
